It has always been the policy of Beeman Precision Airguns/Marksman Products to produce and supply quality products capable of performing above and beyond our customers’ expectations. Beeman/Marksman is dedicated to the application of safety engineering, quality assurance and human factor evaluation in the research, development, manufacturing, sales and distribution of our products. All our products are thoroughly evaluated to ensure they meet or exceed all recognized standards and specifications.

We hope you’ll enjoy this year’s catalog featuring Beeman Precision Airguns and Marksman Products, and experience the excitement of “Shooting: A Sport for Life!”
Beeman PCP Air Rifles

This quality air rifle is an amazingly affordable alternative to other high-cost PCP air rifles. Using compressed air as its power source, our pre-charged pneumatic air rifle uses no springs making it practically recoilless which makes the air rifle more accurate and much easier to use. There is no breaking of the barrel, you need only to pull back the bolt, load the pellet and shoot. The Chief PCP air rifles are very versatile, they are a light weight, shorter air rifle, which makes the air rifle much easier to carry around. Beeman is sure you will enjoy the unique shooting experience with our PCP air rifles.

Beeman CO₂ Air Rifles

The Beeman Precision CO₂ bolt-action rifles have become a staple in the air gun industry. Because of the CO₂ propulsion, there is no need to cock a spring or compress a gas ram. The simple, yet effective, design makes these highly accurate, recoilless rifles very easy for the novice as well as the expert to shoot.

QB II
Model 1085 - .177 Cal.
Model 1085-22 - .22 Cal.
- 10 shot magazine
- Velocity: 650 fps in .177 Cal. & 500 fps .22 Cal.
- Synthetic stock
- Fiber optic sights
- Manual safety
- Bolt action

QB78S
Model QB78S
- Velocity: 650 fps in .177 Cal. & 500 fps .22 Cal.
- CO₂ single shot bolt-action
- Adjustable rear sight
- Adjustable trigger with safety
- Picatinny rail for accessories
- Synthetic stock

QB78D
Model QB78D
- Available in .177 or .22 calibers
- CO₂ Bolt-Action single shot
- Filled by two standard 12 gram cartridges
- Adjustable trigger with manual safety
- European Beech wood stock with raised cheek piece and soft rubber butt plate
- TRUGLO fiber optic sight

The advanced technology of the gas ram system uses compressed gas in a sealed, self-contained unit that is designed to replace the mainspring in a conventional air rifle. The air rifles cock like any other barrel-cocking airgun, but the single cocking stroke compresses a cylinder of gas instead of a mainspring. When the trigger is pulled, the compressed gas expands and drives the piston forward. The main advantage in a gas ram air rifle and a real advantage to hunters is the tireless gas ram power plant that, unlike a steel mainspring, can never take a set or tire with age. Another advantage is the shorter lock time, which aids in field accuracy, as there is less time for the shooter to “pull” off target. The air rifle’s reliable performance in any weather, smoother cocking effort, and more consistent power and velocities make for a truly exceptional airgun.

Model 10616GP

- Gas ram powered
- Synthetic stock
- Noise suppressor
- Fiber optic sights
- 4x32 scope with mounts
- Velocity: 1,200 fps in .177 Cal. & 950 fps in .22 Cal. with alloy pellets
- Automatic safety

- Sturdy all steel construction
- Accepts NRA and other paper targets
- Four interchangeable silhouette animals for varying degrees of difficulty
- Comes complete with pellet trap, 4 silhouette animals, several paper targets and all necessary hardware
- For use with lead pellets only

**Paper Target**  
Model 2099

- 25 count
- For use with 2085 and 2086 pellet traps
The Beeman 4 x 32 air rifle scope, has a full 4 power magnification; with bright and crisp optics, the hallmark of this model. The turret knobs adjust in 1/4" click for both windage and elevation. The parallax is adjustable from 10 yards to infinity.
**Model 3317 - .177 Cal.**
**Model 3318 - .22 Cal.**

- 10 shot magazine
- PCP
- CO₂

- Main Material: Extended part of truncheon is made of high-strength alloy steel, other parts are made of aviation aluminum.
- Color: Black
- Size: Handle diameter 26.5±0.15mm, closed length: 224±1.5mm, open length: 508±2mm
- Weight: Less than 340g
- Anti-shedding performance: In the closed state, when a 5N axial tensile force applied to the stick head, the stick body will open.
- Locking Impact Resistance: In the fully extended state, the stick head can bear the impact of a 300g steel ball, free fall at a height of 1m. The stick body will not close.
- Reliability (stretch out and draw back): The stick can stretch and draw back normally after 30000 times open and close.
- Corrosion Resistance: Be able to withstand 8h salt spray test. Corrosion resistance level is not lower than the 9 level specified in QB / T 3832-1999.
- Axial Tensile Performance: Apply an axial tensile force of 1000N to the stick head. After being held for 1 minute, the stick can stretch and retract normally.
- Bending Resistance: In the fully extended state, 5000N lateral pressure is applied to the middle tube, and after being held for 1 minute, the stick can be normally extended and retracted.
Beeman PCP Air Rifles

Beeman hand pumps are designed to fill PCP Airguns and are designed to compress a maximum amount of air in each stroke. The Beeman pumps allow you to reach a maximum of 4500 psi for Airguns. These accessories are great when going on shooting or hunting trips. Each pump comes with the high pressure air hose with a female foster style fitting, and a liquid filled pressure gauge.
Model 3390
- 4,500 psi
- 110 volts
- Water cooled

Model 3391
- Portable
- 4,500 psi
- 12v DC for car use
- Air cooled

Model 3392
- Portable
- 4,500 psi
- 12 volts
- Air cooled
- With 110 AC to 12 volt DC converter
Introducing the Pocket Hunter, an innovative, all-new patent pending product. The Pocket Hunter’s revolutionary design converts our standard Marksman folding slingshot into a unique compact hunting tool.

It was designed to provide a lightweight and efficient hunting unit that can be folded and easily carried in a backpack, bugout bag, or even in your belt. This ground-breaking product is capable of propelling the included arrow at 115 fps on beefed-up bands that have a pull weight of 42 lbs.

The exclusive pocket and paracord combination allows you to easily nock the arrow, and the patent pending adapter provides a distinct sitting location that allows the hunter to hold the Pocket Hunter and accurately launch the arrow at the intended target.

Pocket Hunter Slingshot
Model 3075

Patent pending adapter allows accurate launching of arrow.

Pocket and paracord combination allows you to easily nock the arrow.

Pocket Hunter Slingshot Replacement Band Kit
Model 3375

Pocket Hunter 31” Carbon Fiber Arrows Kit
Model 3368

Model 3138
• 75 count

.30 Caliber Steel Shot
Model 3130
• 150 count
Airguns are not toys.

Here at Beeman/Marksman, we want you to have a good time with your airgun. But, more important, we want you to be safe. Airguns should be treated with the same respect as you would with any firearm. Failure to use caution with your airgun may result in serious injury or even death.

You must ALWAYS follow the rules of safe airgun handling. Always be aware of your surroundings, and those people around you.

ALWAYS treat an airgun as if it were loaded.

ALWAYS aim an airgun in a safe direction and ALWAYS keep the muzzle pointed in a safe direction.

ALWAYS keep an airgun “on safe” until you are ready to shoot.

ALWAYS wear shooting glasses and make sure those with you wear them also.

ALWAYS use the proper caliber ammunition and NEVER reuse ammunition.

ALWAYS be sure of your target and ALWAYS be sure your target has a safe backstop.

ALWAYS place your backstop in a location that will be safe should the backstop fail.

ALWAYS check to see if an airgun is “on safe” and unloaded when getting it from another person or from storage.

ALWAYS read and follow the Owner’s Manual and all instructions and know how the airgun works before using it.

ALWAYS keep your finger off the trigger and out of the trigger guard until you are aiming at your target and are ready to shoot.

ALWAYS store an airgun in a safe place so that it cannot be used by anyone who is unauthorized to use it.

NEVER point an airgun at any person.

NEVER load an airgun until you are ready to shoot.

NEVER point an airgun at anything you do not intend to shoot.

NEVER shoot at hard surfaces, water, or anything that could cause a ricochet.

NEVER put an airgun away loaded.

You must also follow all state and local laws about the purchase, ownership, and use of airguns. Most airguns are intended for use by those only of certain age, therefore, adult supervision is required.

And remember, misuse or careless use of airguns may cause serious injury or death.

Be safe, have fun, and happy airgunning.
Follow these 12 steps recommended by Beeman for improved results.

1. Spring piston airguns take 500-1000 shots to break in. Groups may be erratic for the first 100 shots or so.

2. “Do not” bench rest your air rifle on ANY solid object! Rest your hand and place the airgun in your hand. Even better, buy an inexpensive sand bag and fill with sand.

3. Rest the forend of the stock on the sand bag, “Never” the barrel.

4. Do not pull the trigger if the barrel is bent down. The barrel will fly up, bend and could cause injury. A cracked and/or broken stock will occur. Guaranteed! This will always void any warranty!

5. Whether your air rifle is a break barrel or underlever, you should always keep one hand on the cocking lever.

6. Hold the airgun “loosely” at the forend, at the grip, and in the shoulder. Spring airguns become “inaccurate” if held tightly.

7. Changing your shooting position or grip can and will change your point of impact.

8. Scopes should be mounted 2.75” to 3” away from your eye.

9. Squeeze the trigger, don’t jerk or pull it.

10. After squeezing the trigger, stay on target for a couple of seconds. Follow through is very critical!

11. Remember each air rifle is an individual and has its own characteristics. To achieve the best performance, you should try a selection of pellets to see which pellet your airgun shoots the best.

12. Your air rifle, your pellet, and your scope don’t know where the target is. It’s up to you to point it straight.

*Good luck and shoot straight!*
